

ShuddhiCheck AI - Myanmar Rural Health Readiness Brief

Last Updated: May 2025

Executive Summary

Myanmar's complex linguistic and geographic landscape presents significant challenges to equitable public health compliance. ShuddhiCheck AI offers multilingual, mobile-first solutions tailored for rural and underserved communities across the country.

Regional Focus Areas

- Shan, Karen, Chin, and Mon regions
- Kachin and Rakhine
- Yangon and Mandalay integration pilots

Language Support Priorities

- Primary: Burmese (full UI and documentation)
- Secondary: Shan, Karen, Chin, Mon (clinic guides)
- Planned: Tamil, English

Platform Benefits

- Multilingual compliance dashboard
- Offline mode for low-connectivity clinics
- Real-time rural health alerts
- Documented ROI of 481%

In Progress

- Burmese translation of onboarding flows
- Mobile pilot in Karen and Shan clinics
- Risk reporting API for remote areas

Target Collaborators

- Ministry of Health
- Rural clinic networks
- NGOs and mobile health providers

Next Steps

1. Finalize Burmese UI assets
2. Select pilot partners
3. Launch sandbox in 3 zones by July 2025
