

ShuddhiCheck AI – Singapore Readiness Brief

Last Updated: May 2025

Overview:

ShuddhiCheck AI is a HIPAA-secure, AI-driven compliance and risk management platform designed for public hospitals. Singapore represents a uniquely tech-forward environment where our platform can support high-compliance goals.

Key Focus Areas:

- Public hospitals and polyclinics integration
- Pandemic readiness dashboards (MOH-aligned)
- NGO and eldercare facility compliance automation
- University health innovation pilot collaboration

Language Support:

- English (official administrative and clinical use)
- Mandarin Chinese (for eldercare and family-based care)
- Malay (minority inclusion)
- Tamil (minority inclusion)

Implementation Timeline:

- Week 1: Setup + API alignment with Singapore's MOH structure
- Week 2–3: Pilot at selected polyclinic or eldercare facility
- Week 4: Staff training and compliance auto-tracker onboarding
- Month 2: Full rollout with AI dashboards + multilingual UI

Benefits for Early Adopters:

- 25% discount through June 2025
- No setup fee for 2025 pilot partners
- Real-time analytics dashboards
- Custom dashboards for ministry compliance

Prepared For:

- Singapore Ministry of Health
- National Healthcare Group (NHG)
- Singapore General Hospital (SGH)
- Community Care Facilities and NGOs
