

ShuddhiCheck AI – Malaysia Readiness Brief

Last Updated: May 2025

Overview:

ShuddhiCheck AI is an AI-powered, HIPAA-secure compliance platform designed to assist Malaysia's rural health system. The system supports Malay and English interfaces, with upcoming Tamil and Mandarin integration for full rural reach.

Focus Regions:

- Sabah and Sarawak (underserved rural areas)
- Kelantan and Terengganu (public health priority zones)
- Johor and Selangor (mobile pilot partnerships)

Key Features for Malaysia:

- Malay dashboard and form localization
- Mobile-first offline compliance for remote clinics
- Alerting for MOH regulation updates and infectious disease compliance
- NGO and Ministry of Health (MOH) collaboration-ready

Implementation Timeline:

- Week 1–2: Localization and health system setup
- Week 3–4: Mobile deployment and staff onboarding
- Month 2: Reporting dashboard + alert integration

Early Adopter Benefits:

- 25% discount (valid through June 2025)
- Full translation support (Malay + Tamil)
- No setup fees for first 5 rural partners

Prepared For:

- Ministry of Health Malaysia (MOH)
- NGO partners in rural compliance and training
- ASEAN health resilience initiatives
