ShuddhiCheck AI – Phase II Country Readiness Brief

Country: Wales

Region: United Kingdom

Phase II Launch Date: May 2025

—————————————————————————————————

1. Overview

Wales manages its healthcare system through NHS Wales, with dedicated Health Boards that govern services across regions. ShuddhiCheck AI aims to support these Health Boards with targeted compliance dashboards, safety alerting tools, and region-specific monitoring features.

2. Compliance Environment

Key Frameworks:

- UK GDPR (Wales-compliant data handling)

- NHS Wales Information Governance Framework

- Healthcare Inspectorate Wales (HIW) audit and inspection guidelines

Target Alignment Areas:

- Real-time audit tools for Health Boards

- Public health compliance dashboards

- Data security tools for care transitions

3. Local Context

Wales uses seven regional Health Boards to manage its population's healthcare delivery. The smaller scale of the population creates a unique opportunity to test ShuddhiCheck AI's compliance technology with deep localized engagement.

4. Localization Notes

- Use of 'Health Boards' terminology throughout

- Align with NHS Wales governance expectations

- Optional Welsh language accessibility for public reporting tools

5. Initial Outreach Targets

- NHS Wales Informatics Service (NWIS)

- Digital Health and Care Wales (DHCW)

- Healthcare Inspectorate Wales (HIW)

- Regional Health Boards (e.g., Betsi Cadwaladr University Health Board)

6. Demo Readiness

- Display compliance scorecards for Health Boards

- Incorporate HIW-aligned audit readiness toolkit

- Demonstrate alert routing for service transitions

Status: ✅ Country added to Phase II

Next Step: Engage NHS Wales leadership for pilot opportunities starting June 2025
