ShuddhiCheck AI - Taiwan Readiness Brief

Last Updated: May 2025

Taiwan Executive Summary

Taiwan's healthcare system is highly developed, yet rural and elder populations require targeted digital support. ShuddhiCheck AI provides a secure, multilingual compliance platform to support public health coordination, hospital readiness, and mobile unit integration in both urban and rural areas.

Language Prioritization

- Mandarin Chinese: Primary language for interface and compliance workflows

- Taiwanese Hokkien: Optional UI for eldercare and rural outreach

- English: Secondary toggle for younger and urban users

- Hakka & Formosan languages: Not included in initial rollout, noted for inclusion in equity discussions

Focus Regions

- Chiayi and Yunlin counties: rural eldercare & mobile health units

- Tainan and Kaohsiung: urban-rural compliance hubs

- Taipei: policy outreach, regulatory onboarding, urban deployment pilots

Implementation Timeline

Week 1: System access + staff onboarding

Week 2: Language toggle activation + dashboard rollout

Week 3: Policy compliance integration with local health units

Week 4: Live deployment + feedback collection

Pending Items

- Mandarin-to-Hokkien UI prototype

- Taiwan CDC alignment checklist

- Urban-rural cloud compliance sync
